69th EAGE Conference & Exhibition ExCeL London : 11-14 June 2007

Badley Geoscience Ltd will be exhibiting, along with our Alliance partners Midland Valley and Integrated Exploration Systems, at this year's EAGE Exhibition in London. Visit **Booth 674** for a technical update on the new TrapTester 5.4 release and to see demos of the new TrapTester functionality:

- ◆ TransGen functionality within TrapTester ([EarthGrid/TMXMapper](#))
- ◆ Geomechanical fracture prediction ([FaultED](#))
- ◆ Structural maps from sparse 2D data ([GridTool](#))
- ◆ New data management ([DataExplorer](#))
- ◆ Support for reverse structure ([FrameworkBuilder](#))
- ◆ Arbitrary line support ([SeismicModule](#))
- ◆ Time slice interpretation ([SeismicModule](#))
- ◆ Culture and contour displays ([BasemapModule](#))
- ◆ 3D well curve displays ([WellModule](#))
- ◆ Direct links and launch of **2DMove** ([Seismic Module](#))

We will be happy to discuss with you any issues relating to structural geology and tectonics in which we and our alliance partners may be of assistance.
