

## Badleys Website Updated

We're excited to share that Badley's brand-new website is now live — [check it out!](#)

Redesigned for a smoother, more intuitive experience — and built around our three core strengths: Software, Consultancy, and Training.

💡 Explore our brand-new CO<sub>2</sub> storage page, highlighting how our expertise and technology support the energy transition.

🧠 Dive into our software portfolio and discover the full range of T7 modules — from fault seal analysis to structural modelling.

🚀 And this is just the beginning... stay tuned for the upcoming release of T7.4, our most powerful version yet, packed with cutting-edge features.

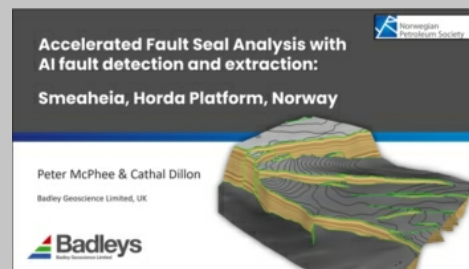

Take a look and see what's new!

## Badleys at the "Deal with the Seal" Webinar

We're excited to announce that Badleys will be participating in the Norwegian Petroleum Society's (NPF) Deal with the Seal webinar series on June 12th, from 09:00 to 12:00 CET.

Peter McPhee will present his latest work on integrating AI-driven fault detection and extraction into fault seal analysis workflows.

Meanwhile, Pete Bretan will deliver a review of fault seal analysis in carbon storage, exploring current challenges and offering insights into future developments.

This is a great opportunity to hear from industry leaders and explore cutting-edge developments in fault seal analysis.

Register and learn more here: [Deal with the Seal Webinar 2025](#)

## Badleys Visit Malaysia & Indonesia

The Badley's team recently wrapped up a productive trip to Kuala Lumpur and Jakarta, where we had the pleasure of connecting with many of our T7 users.

The T7 User Meeting in Kuala Lumpur was a fantastic success, made possible by the outstanding support of our regional representatives at Salcon. A big shoutout to Nazar, Wanda, and Amin (see right-bottom picture, pictured right to left) — an awesome team doing great work!

It was a bustling IPA Jakarta, filled with reconnecting with old friends and meeting new faces. A special thank you to Nini, Dewi, and Ghufon (see left-bottom picture, pictured left to right) — the formidable team at Petropro representing Badley's in Indonesia. We're truly grateful for their tireless dedication; they're the best of the best!

If you'd like to learn more about the latest developments in T7 or explore how Badley's can support your company or department through exploration challenges, we'd love to hear from you. Get in touch with us at Support to arrange a chat or web meeting.
